

There were issues affecting this run of Lighthouse:

- There may be stored data affecting loading performance in this location: IndexedDB. Audit this page in an incognito window to prevent those resources from affecting your scores.
- The page may not be loading as expected because your test URL (<https://emias.mos.ru/app/mosru/>) was redirected to https://emias.mos.ru/sudir-web/?code=eP3mvoxohuHIB48BXkcmx6q2jX10_VrRrNZaX24Ch1zmotW2ow3KgZvDD8V0Y2CM3gazGakaYc0j61Mdz3hXq19Pu-i-Cpq_Ucmq1Mozp6I&state=mosru. Try testing the second URL directly.

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

CONTRAST

- ▲ Background and foreground colors do not have a sufficient contrast ratio.
- ▲ Links rely on color to be distinguishable.

These are opportunities to improve the legibility of your content.

TABLES AND LISTS

- ▲ Lists do not contain only `` elements and script supporting elements (`<script>` and `<template>`).

These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.

NAVIGATION

- ▲ Some elements have a `[tabindex]` value greater than 0

These are opportunities to improve keyboard navigation in your application.

NAMES AND LABELS

- ▲ Skip links are not focusable.

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)
